

Trending Newsletter in January

Creative Bioarray is an innovative biotechnology company whose mission focuses on developing unique technologies that provide global scientists with high-quality products and satisfactory services to facilitate the investigation of life science researches.

Join our free trending newsletter to get the latest information about site updates, news, and special events.

Theme for the January — Cell Proliferation

The process of cell proliferation and differentiation plays a key role from the time of embryogenesis to development of the whole organism. But abnormal cell proliferation will result in human diseases like cancer. Thus, the rate of cell proliferation can be a useful signal in clinical or pharma researches.

Featured Products

Cell Proliferation Kits

We aim to provide innovative, high-quality assay kits to help you quickly obtain accurate and reproducible results. With our assay kits, you will receive highly precise and accurate results across a wide dynamic range with efficient processing...[Read More](#)

Most Popular Services

Cell Proliferation Assay Services

The rate of DNA replication, analysis of metabolic activity, cell surface antigen recognition, detecting proliferation markers, ATP Measurement, measures of membrane integrity and so on are all methods to test cell proliferation...[Read More](#)

Information of Upcoming Events

Name	Application	Date	Country	Event type
Chemistry and Biology of Peptide	Peptide	2018/2/11-2018/2/16	United States	Conference
39 th Annual Lorne Genome Conference	Genome	2018/2/11-2018/2/13	Australia	Conference
9 th International CGRP Family Peptide Conference	Pharma	2018/2/13-2018/2/15	United States	Conference
The 4 th European Conference on Clinical Research	Clinic	2018/2/26-2018/2/27	Australia	Conference

Video

Cell Proliferation Assay Services

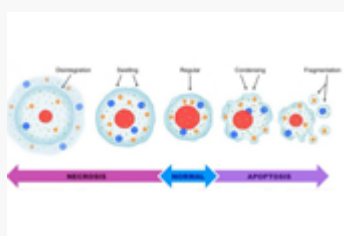

Creative Bioarray provides cell proliferation assay service for our customers. We provide optional assay methods based on the cell type and protocol... [Read More](#)

Cell Cycle and Cell Cycle Assay

Cell cycle is the most fundamental and important process by which eukaryotic cells duplicate and divide. This video will talk about the method to analysis the cell cycle... [Read More](#)

Blog

General Methods for Cell Apoptosis Assay

What is cell apoptosis? Cell apoptosis refers to the programmed cell death controlled by genes to maintain stable internal conditions... [Read More](#)

How to Choose Cell Model and Test Indicators on Determining Clinical Basic Research Topics

About clinical basic research, the innovation will be how to design the gene research content. Clinical relevance, function, mechanism, all of... [Read More](#)
