Theme for May—Immunohistochemistry (IHC)

IHC is a routine method to detect antigens in cells of a tissue section by exploiting the principle of antibodies binding specifically to antigens in biological tissues. It is widely used in the diagnosis of diseases and characteristic of particular cellular events. IHC is also a common method in basic research of disease to help understanding the distribution and localization of biomarkers and differentially expression of proteins in different parts of tissue.

Featured Services

Immunohistochemistry Service

Creative Bioarray offers a comprehensive IHC service from project design, marker selection to image completion and data analysis...

Information of Upcoming Events

Name	Application	Date	Country	Event type
BIO International International Convention 2018	Biotechnology	2018/6/4-2018/6/7	United States	Trade show
12th Annual Conference on Stem Cell and Regenerative Medicine	Stem Cell & Regenerative Medicine	2018/6/4-2018/6/6	Czech Republic	Conference
Biomarkers & Immuno-Oncology World Congress	Biomarker	2018/6/11-2018/6/13	United States	Conference
Microbiome Drug Development Summit	Microbiological pharmacy	2018/6/20-2018/6/22	United States	Conference
